PROFILE

Second-year B.Sc. Computer Science student at Pillai College of Arts, Commerce and Science, with a strong interest in software engineering, web development and data-driven problem solving. Builds practical projects using Java, Python and web technologies, and enjoys applying programming and analytical skills to real-world challenges.

EDUCATION

Pillai College of Arts, Commerce and Science — Panvel, India
Bachelor of Science (B.Sc.) in Computer Science | 2025–2028
Current SGPA: 9.60+ | Relevant track: Data Science

TECHNICAL SKILLS

Programming: Java, Python, R
Web Development: HTML, CSS, JavaScript, React, PHP
Databases: SQL, MySQL
Data & Analytics: Microsoft Excel, Microsoft Power BI, Data Analysis, Data Visualization
Computer Science: Data Structures & Algorithms, OOP, DBMS, Operating Systems
Areas of Interest: Software Development, Data Science, Machine Learning, Problem Solving

EXPERIENCE

National Service Scheme (NSS) Volunteer | Pillai College of Arts, Commerce and Science | On-site, 2025–Present

- Participate in community service initiatives and social-awareness activities focused on public welfare and civic responsibility.
- Support college and community outreach activities, collaborating with peers to coordinate and execute social initiatives.
- Develop communication, teamwork, coordination and problem-solving skills through community engagement.

PROJECTS

UrbanFlow — Smart City Traffic & Road Accident Intelligence Platform | Personal Project
An intelligent urban-traffic platform featuring traffic-congestion prediction, accident-risk insights, road-corridor risk scoring and interactive map-based visualisation. **Technologies:** React, TypeScript, Python, FastAPI, machine learning, SQLAlchemy, SQLite, Leaflet and GeoJSON.
Live Website | GitHub Repository

TRAVORA — Personalized Dynamic Tour Planning & Tour Operations Platform | Hackathon Project
A platform for personalised tour planning and tour operations, with itinerary planning, travel insights and interactive mapping. The team was selected to participate in a national-level hackathon. **Technologies:** Python, FastAPI, SQLAlchemy, JavaScript, HTML, CSS, Tailwind CSS, Leaflet.js and Chart.js.
Live Website | GitHub Repository

RASEED — Receipt Duplicate Detector | Mini-Hackathon Project
A receipt-auditing solution designed to flag potentially duplicate expense submissions using receipt details and similarity-based checks, with reviewer oversight. Placed fourth in a mini hackathon.
GitHub Repository | Live demo not currently available

HACKATHON HIGHLIGHTS

2× Second Place: College Hackathon and SIH Internal Hackathon | **4th Place:** Mini Hackathon (RASEED) | **National-Level Selection:** TRAVORA team selected to participate.
